Dear Colleagues

Head & Neck Onco-Radiology is often considered daunting and difficult. Radiologists and clinicians need to be aware about why imaging is ordered, which modality is optimal and what is an optimal report. Being aware of what the clinician needs to know helps make the radiologist's contribution invaluable.

Essentials of Head & Neck Onco-Radiology aims to familiarize you with the fundamentals. For this purpose we have the privilege to bring to you Prof. Suresh Mukherji, one of the most distinguished figures and speakers in this field.

The CME has a series of lectures and ends with a case based panel discussion which will help you self examine your approach to Head & Neck Radiology. Clinico-radiologic issues will be discussed and simplified.

Prof Suresh Mukherji is a pioneer in the field of Head & Neck radiology with innumerable original contributions. He has authored more than 250 publications in peer-reviewed journals, 13 textbooks on Head & Neck and Neuroimaging and 74 book chapters in other textbooks.

He has delivered more than 300 invited lectures and has oratory skills that are unparalleled, being able to communicate with ease, both the fundamentals and the complexities of the subject.

It is fortunate that we have him with us for this daylong CME where he will refresh us with the basics and sensitize us to the intricacies of Head & Neck Oncoimaging. We request you to block 25th of Jan 2012 on your calendar and join us for this CME...
